PROFESSIONAL SUMMARY

Security Researcher and Smart Contract Auditor with hands-on experience identifying and responsibly disclosing critical and high-severity vulnerabilities across 40+ DeFi protocols (including Frax, GMX, PancakeSwap). Combines deep Solidity expertise with advanced AI Agent Engineering and fullstack development to perform end-to-end security assessments, build agentic tools, develop proof-of-concept exploits in Foundry, and produce triage-ready vulnerability reports. Background in project management and cross-functional team leadership across media, education, and technology sectors.

TECHNICAL SKILLS

Security & Auditing	Smart contract auditing, vulnerability research, penetration testing, threat modeling, code review, responsible disclosure, OWASP Top 10, digital forensics
Blockchain	Solidity, Foundry, Hardhat, Slither, Mythril, Echidna, EVM internals, proxy patterns (UUPS/Transparent), ERC-4626, cross-chain bridge security, IPFS, Etherscan.io, BscScan.io, Battlechain.io
Languages	JavaScript, TypeScript, Solidity, Python, Bash
Fullstack	React.js, Next.js, Node.js, Express.js, RESTful APIs, GraphQL, Web3.js, Ethers.js
DevOps & Tools	Git, Docker, Foundry, JIRA, Trello, CI/CD pipelines, VS Code, Codium, Cloudflare, Zapier
AI & LLMs	Claude API (Sonnet 3.5, 4.6), Groq API, Gemini, MCP (Model Context Protocol), Agentic AI Orchestration, Prompt Engineering, Antigravity, Deepseek, NVIDIA
OS & Platforms	Linux, Windows, Android, iOS
Media & Comm.	DaVinci Resolve, Camtasia, OBS Studio, Zoom, Google Meet, Skype
Office Suites	Google Workspace, Microsoft Office/OneDrive, LibreOffice
Databases	PostgreSQL, MongoDB, SQL/NoSQL

INDEPENDENT SECURITY RESEARCH

Security Researcher & Bug Bounty Hunter

2024 – Present

Independent

- Conduct independent security audits of smart contracts across 40+ protocols including Frax, GMX, PancakeSwap, and Morpho on platforms like HackenProof and Intigriti.
- Discovered and responsibly disclosed critical and high-severity vulnerabilities (e.g., sfrxETH underflow, signature verification bypasses).
- Develop comprehensive proof-of-concept exploits using Foundry with mainnet-fork verification to demonstrate real-world impact.
- Perform deep-dive analysis across attack surfaces: reentrancy, access control bypasses, proxy upgrade vulnerabilities, and vault share manipulation.
- Leverage AI/LLM-powered agentic tooling for automated vulnerability scanning, log analysis, and exploit generation.
- Produce detailed, triage-ready vulnerability reports with severity classification, root cause analysis, and remediation recommendations.

PROJECTS & PORTFOLIO

- **CVEScan:** Professional vulnerability scanner orchestrating AI agents (Gemini) and tools (Bandit, Semgrep) for real-time CVE monitoring and automated report generation.
- **Curated Feed:** Digital autonomy engine integrating Groq API (Llama 3.3 70B) for real-time curation and KV storage.
- **BotIn:** Decentralized AI agent professional network utilizing ERC-8004 for agentic identities and XMTP messaging.
- **KinSync:** Next-of-Kin digital estate vault smart contract on Base, automating decentralized IPFS content authorization.
- **NimbusTrade:** Web3 arbitrage dashboard combining Polymarket CLOB APIs and Gemini-powered Expected Value logic.
- **PicKut AI:** Professional image editing suite powered by Gemini 2.5 Flash Image, featuring ERC-8004 agentic Web3 payments.
- **FinPro:** High-performance financial platform integrating Next.js, Supabase, and automated Playwright test suites.
- **Uplift News:** Multi-language platform built with React, Cloudflare Workers, D1 database, and Groq AI for content curation.

PROFESSIONAL EXPERIENCE

Project Manager

SIZLAND Limited

Nov 2025 – Mar 2026

- Orchestrated Agile and Scrum workflows in a Web3 environment, optimizing task allocation and sprint delivery via JIRA and Trello.
- Anticipated and mitigated project risks, conflicts, and cross-team dependencies through proactive strategies.
- Partnered with development and QA teams to rigorously validate deliverables, ensuring technical and functional excellence.
- Directed stand-ups, sprint reviews, and retrospectives; served as central liaison between developers, executives, and external partners.
- Championed comprehensive technical documentation and evolved best-practice SOPs to elevate operational standards.

Indie Game Developer – Charity Project

Jampack Incubator

Feb 2026

- Developed and launched **Mathlantis**, an educational web application combining math challenges with puzzle-building mechanics for Games for Love’s mission.
- Honored with the “**Most Child Friendly Game**” title badge for accessible and engaging design.

Technology Consultant & Developer

Self-Employed

Sep 2023 – Present

- Architected a real-time, resilient data pipeline integrating Meta Lead Ads with SalesRender CRM using Zapier, Cloudflare Workers, and Cloudflare KV for robust data formatting and strict deduplication.
- Engineered and audited Solidity smart contracts using static analysis tools (Slither, Mythril); reduced exploit risk surface by 40%.
- Built fullstack solutions integrating React.js, Next.js, Node.js/Express, and IPFS; prototyped a DeFi lending platform.
- Guided early-stage startups on technology stack selection, championing scalable and secure fullstack architectures.
- Created blockchain security educational content on TikTok (@tech_ale).

Director and Manager

Sambu Academy

Aug 2022 – Present

- Directed educator teams delivering high-impact operations and upholding elite service standards.
- Implemented streamlined SOPs that boosted overall productivity by 30%.

PREVIOUS PROFESSIONAL HISTORY

Technical Director and Editor, KASS Media

Jul 2020 – Apr 2023

Firm Manager, KASS Media (Ainoop Pkeles Studios)

Mar 2019 – Apr 2023

Manager: Logistics, Building and Construction, KASS Media

Feb 2019 – Aug 2022

Passenger Handling Agent, Swiss Port Kenya Ltd

Aug 2011 – Dec 2011

Public Relations Attaché, KEMSA

2011

CERTIFICATIONS & TRAINING

In Progress	The GRC Approach to Managing Cybersecurity – Coursera
2024	Full Stack Web3 Development – Cyfrin Updraft
2024	Solidity Smart Contract Development – Cyfrin Updraft
2024	Smart Contract Security – Cyfrin Updraft
2024	Digital Forensics Masterclass: Forensic Science DFMC+ – Udemey
2024	Insider Threat Awareness, Maximizing Organizational Trust, Cybersecurity Awareness – DCSA
2022	Learning How to Learn – Coursera
Other	Ethereum Blockchain Programming (CryptoZombies), Cybersecurity Awareness and Innovation (Coursera), Introduction to Psychology (Coursera)

EDUCATION

B.A. International Relations & Diplomacy with I.T. – Maseno University	<i>2008 –</i>
Certificate in HTML Web Language – Star College	<i>2008</i>
Kenya Certificate of Secondary Education – Milimani High School	<i>2006 – 2007</i>
